As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a projectimplementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. laddered approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knowledge in web developing world.

We also thank you so much for your infomation and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 07.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

This website provides information about mountaineering, including the history of mountaineering, techniques, and mountaineering groups/clubs...

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back ***eprojects@apttech.ac.in*** as the assigned schedule.

Design Plan: Moutaineering	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 08-12-2023	Version 1.0	Page No: 2 of 29

Problem Definition

Mountaineering, also called mountain climbing, the sport of attaining, or attempting to attain, high points in mountainous regions, mainly for the pleasure of the climb. Although the term is often loosely applied to walking up low mountains that offer only moderate difficulties, it is more properly restricted to climbing in localities where the terrain and weather conditions present such hazards that, for safety, a certain amount of previous experience will be found necessary. For the untrained, mountaineering is a dangerous pastime.

Unlike most sports, mountaineering lacks widely-applied formal rules, regulations, and governance; mountaineers adhere to a large variety of techniques and philosophies when climbing mountains.

Users can access the website and search for information about mountaineering types, techniques, mountaineering history, details about mountaineering groups/clubs, and register as members through the registration form...

The webmaster can edit website information, check member registration details...

Design Plan: Moutaineering	Document Name: Customer Requirements Specifications	SWD/Form No.02/CRS/Ver1.0
Effective Date: 08-12-2023	Version 1.0	Page No: 3 of 29

Customer Requirements Specifications

User:

input:

- About moutaineering
- Clubs/groups
- Collection/gallery

Process:

- Search title “mountaineering”
- Search title “clubs/groups”
- Search title “collection/gallery”

Output:

- information about mountaineering: style, technicians, history
- information about clubs/group/organizations...
- video, image

Records

Fastest Growing Mountain: Nanga Parbat

While not as tall as some of the others on this list, Nanga Parbat's status as the world's fastest-growing mountain seems worth a mention. As of 2005, the 8,126-meter (26,660-foot) peak is reportedly growing at a rate of 0.27 inches per year, which puts it on track to outstrip Everest as the world's tallest peak in around 240,000 years. This isn't particularly exciting, although it does mean that in a corner of a million years at the fastest record-growing gloom may have their time fixed.

[Explore Now](#)

Fastest Time To Walk Up Kilimanjaro Backward: 24 Hours

Attn: Kilimanjaro. The ultimate walk-up, and as such, the ultimate stomping ground for all mountaineering record seekers. Nepal's Mount Everest (Saggy Parbat) walked backward to the 19,341-foot high point of Africa on December 10, 2005, clocking in at 24 hours and 40 minutes.

[Explore Now](#)

Longest Tyrolean Traverse Over A Lava Lake: Karina Oliari, 32ft

Italian woman Karina Oliari pulled herself 32 feet over a lava-filled crater in Ethiopia. Wearing what looks like an advanced suit, in December 2007, "the most challenging part of this record," she said, "was finding two good rigging spots." Tyrolean don't really require any particular skill or fitness level, so this is something any of us could do! Probability, but this course could be used to get out of a small bear home, so it might be worth a mention.

[Explore Now](#)

Largest Clean-Up On Everest: 22,879 Lbs Of Trash

After all these records, most rather depressing, I've decided to end on a positive note. The Guinness World Records lists the "largest clean-up on Everest" as a 49-day effort by 12 Sherpas between April and May of 2008, collecting a whopping 22,879 pounds of garbage, as well as four dead bodies left on the mountain.

[Explore Now](#)

Most People Connected By A Rope: 2,848

Surprisingly, this didn't occur as a result of some tourist nonsense on the Half Dome. Rather, it's a group of 2,848 people rappelling down the 100-foot vertical face of the Italian Bergamotte Alps in July of 2007. 2,848 people rappelled themselves together, ostensibly organized to "[promote] safety and sustainability

[Explore Now](#)

Longest Line Of Tents: 721

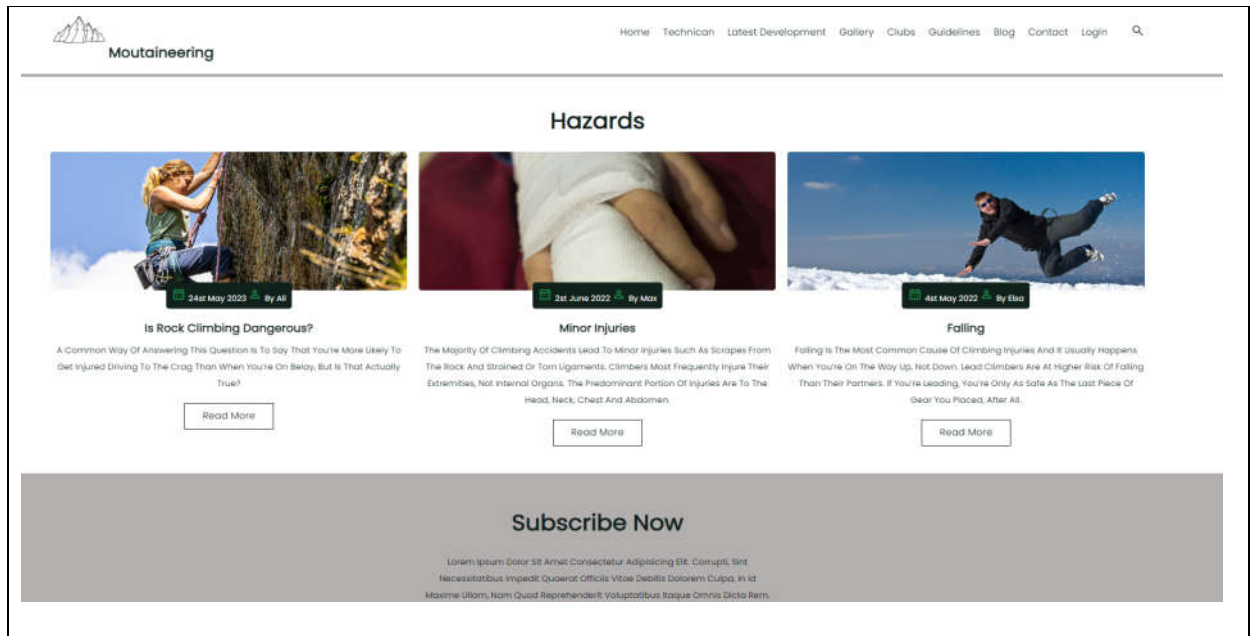

Surprisingly, the world's longest line of tents isn't found outside your local Best Buy on Black Friday. In fact, the world's longest line of tents consisted of 721 tents erected on a wooded walkway in the Whangarei Mountains in New Zealand. On October 21, 2006, the total line of tents, put up by 200 volunteers as part of a local tourism initiative, measured 4,853 feet.
